

DAZZLE.

Installation and User Guide

Installation :

Before running the project you must create a Database in mySql with named “dazzle”

You will find the backup db.sql file in database/dazzle.sql

factories	12/9/2023 2:47 PM	File folder	
migrations	1/25/2024 1:46 AM	File folder	
seeders	12/9/2023 2:47 PM	File folder	
.gitignore	12/9/2023 2:47 PM	Text Document	1 KB
dazzle	1/26/2024 1:07 PM	SQL-Script	20,710 KB

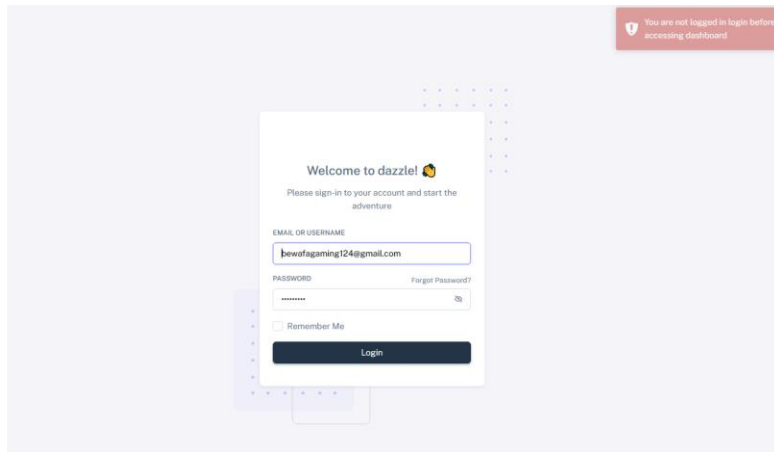

Type: SQL-Script
Size: 20.7 MB

After Successfull implementation and importing the DB you will be able to run the project other wise it won' t run.

Admin Dashboard:

Admin dashboard is where you will control the whole website cuz must of the things are being controlled and created by admin it self like Navbar links , Posters , Carousels and etc for the project setting to gain access to the dashboard you need tp navigate to the url which is

URL LOGIN ADMIN: localhost:8000/admin/login

URL DASHBOARD: localhost:8000/admin/dashboard to access dashboard

And the use super admin account

Credentials which are given below:

EMAIL: hassan2109f@aptechgdn.net

PASSWORD: Bewafa123

After a successful authentication you will have access to manage all these things in Dashboard.

Which are present in this side bar only super admin will be able to control some specific features not the other admins.

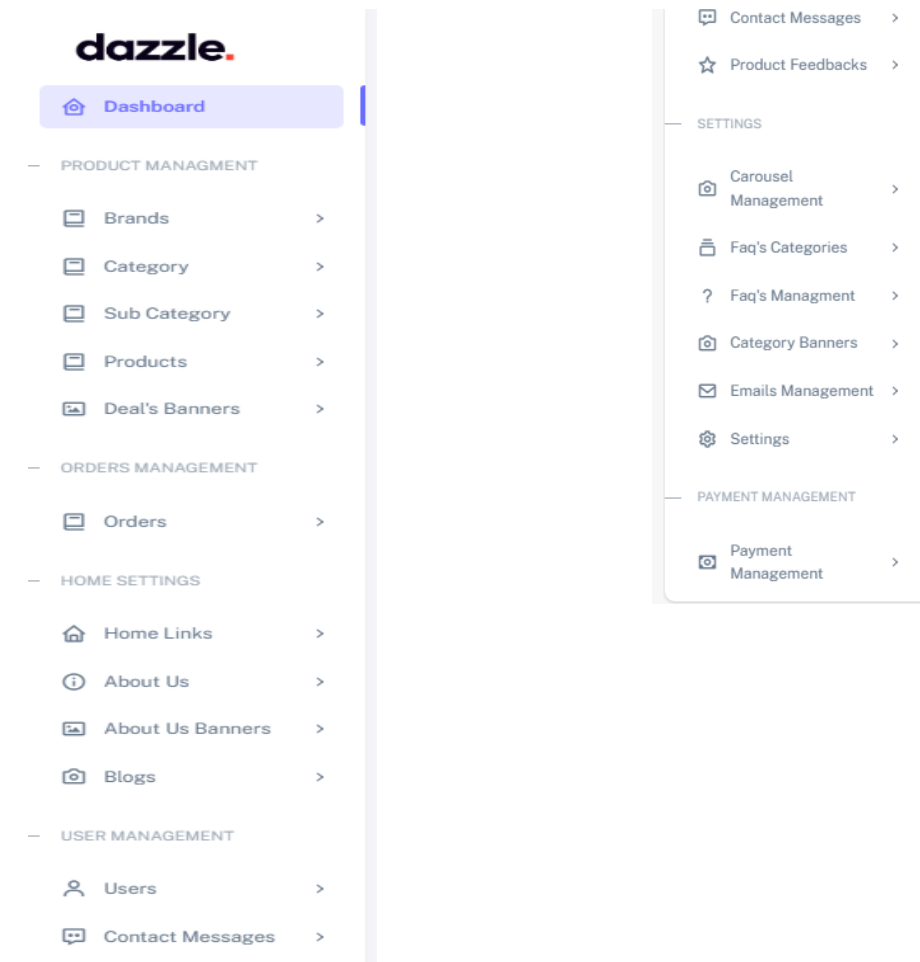

SIDEBAR FEATURES OF DAZZLE. ADMIN

DASHBOARD

These are the navigations in admin dashboard where you will be able to create Products , Categories , brands , subcategories for Marketing and for Dazzle website you

Will be able to create blogs, FAQs , about us information, contact information , setting page to add all the information about project like main logo website title x-fevicon email

Contact number , contact email etc , you will able to manage all the orders products etc

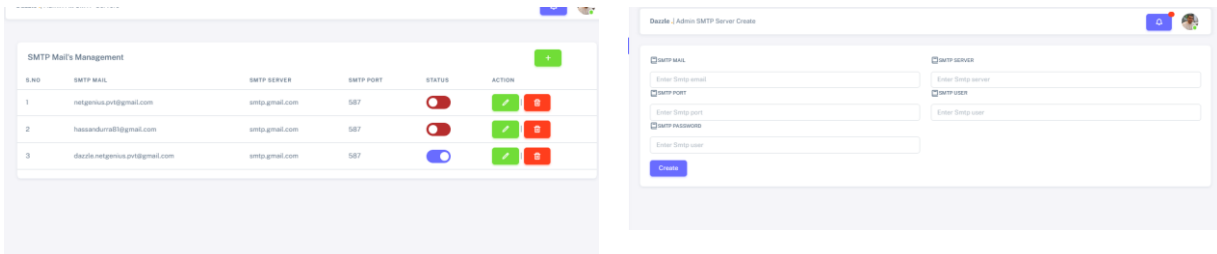

That was all about the dashboard in User Section super admin will have access

To create sub-admins to control the dashboard specific features.

Home links section is where you will create and add links to navigation bar

SMTP MANAGEMENT SECTION:

A SMTP section where you can add smtp emails that will be used to send and retrieve Emails .

ALL SMTP SETTING PAGE AND CREATING OR ADDING OTHERS

USER SIDE:

In user side if a customer wants to add product to cart he/she be a member of Dazzle. Means should register it self as a user for that we have a register page Because there are several things which won't work without being logged in for example Creating order , giving feedbacks to products, add comments to the blogs and changing account setting etc.

User Registration Page:

URL: localhost:8000/registration

dazzle. Search...

Category HOME BATH AND BODY MEN'S GROOMING FRAGRANCES SKINCARE TAILORED CLOTHING PAGES

☐ I agree all statements in [Terms of service](#)

And here a user will be registered they should provide a valid email to receive and Email verification in their mail to confirm the registration otherwise they won't be Able to login in our website.

The next step after successful registration and email confirmation user will be able to login :

LOGIN USER SECTION:

URL: localhost:8000/login

And this is all we need to do for a successful user registration after that the user will have access to their accounts where they can manage orders and address for their delivery and also the account setting they will be able to place orders , add products to carts , adding feedbacks and comments to products and the blogs etc .

THANK YOU.!
